

Return Toaster

Big Volume in a Small Space

Return Toaster

Big Volume in a Small Space

The new Lincoln Conveyor Return Toaster features big volume in a small space. This self contained, conveyORIZED unit is designed for countertop use and is stackable up to two high. Toasting intensity can range from 1.0 to 9.9 while the conveyor speed is adjustable from 10 to 99 seconds.

SIMPLE, EASY TO OPERATE

- New Digital Controls are located on the front of the unit. The controls include an on/off switch, intensity control, digital display, conveyor speed control and two programmable pre-set menu buttons. Operators also have independent control of two exit side heating elements... all with just the push of a button.

VERSATILE

- The new Lincoln Conveyor Return Toaster is designed to accommodate a variety of bread products by adjusting the conveyor speed to create lighter or darker toasting and to allow for thicker products that contain moisture such as English muffins or fresh bagels.

STURDY CONSTRUCTION

- Constructed of stainless steel and consists of durable components for extended life. The conveyor belt is a flexible stainless steel design with capacity for 10" wide product and the stepper motor helps eliminate conveyor belt jams and motor damage.

BIG VOLUME & HIGH SPEED PERFORMANCE

- Convection assisted toasting results in increased productivity. More capacity in less time saves energy.

CONSISTENT PRODUCT QUALITY

- The new 8005 Return Toaster is equipped with an advanced patent pending controller that results in superior toasting and productivity performance. Once the intensity level and belt speed are set, this new controller ensures that the intensity level of the heating elements is maintained at a constant level by regulating the power delivered to them. It also independently adjusts the conveyor belt speed by detecting fluctuations in power delivered to the heating elements – allowing a 99% consistent product look, feel, and texture, and taste independent of voltage fluctuations and/or load conditions. In addition, the new 8005 Return Toaster features profiled zoned elements to produce even toasting across the chamber...no sacrificing of productivity.

ENERGY EFFICIENT

- Innovative air curtain prevents heat loss. Each unit is equipped with a voltage detection feature that identifies and adapts to incoming voltage.

Model #	Width	Depth	Height	Belt Width	Frequency	Amps	Watts	Voltage	Phase
8005	15" (381 mm)	26 1/2" (673 mm)	16" (406 mm)	10" (254 mm)	60 Hz	23.3	4850	208/240	1Ø
